Office Action Summary

Receipt is acknowledged of amendment of 4/9/02 and election confirmation of 9/24/01.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's election with traverse of Group I, the single compound, benzyl alcohol as species in Paper No. 8 is acknowledged. The traversal is on the ground(s) that no reasons were given for restriction/election. This is not found persuasive because Page 2 of 10/09/01 Office Action lays out basis for restriction/election. The inventions are considered to be patentably distinct; and multiple search would constitute a burden to the Office. If applicant wishes to declare all species equivalent to each other, the species election will be lifted.

The requirement is still deemed proper and is therefore made FINAL.

Claims 4-6, 8-11, 14-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 8.

Examiner appreciates removal of the questionable terminology. Although not further explained, "pesticidally" acceptable will be taken to mean any vehicle or carrier useable in a pesticide formulation, regardless of whether or not it is innocuous. The 112 rejection is withdrawn.

Claims 1, 7, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Dow et al 1514377.

Art Unit: 1616

The rejection of record is maintained.

Claims 1, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang-4446153.

The rejection of record is maintained.

Note the pesticidal carriers-water.

Applicant's arguments filed 4/9/02 have been fully considered but they are not persuasive. Applicant argues prima facie basis for rejection, then for inherency, are not met. However, examiner finds the references cited, representative of many disclosing benzyl alcohol and carriers, suitable for pesticidal use, anticipate the instant compositions= no weight need be given to future intended use—as contact poison, as termicide control agent. As to the methods; these have not been demonstrated by applicant, expect for use of an acetone carrier when termites are placed in the test area. This is a far cry from application of carrier and benzyl alcohol to a termite habitat. However, even if this were done (it is, by Dow—he applies his mix to trees; termite habitats)

The claimed “control” is ambiguous and indefinite and unexplained in the specification—we find no termites in Dow—they were controlled, we agree the rejections not maintained do not specify benzyl alcohol, the elected species.

Claims 1 and 12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 5 of copending Application No. 09/505680. Although the conflicting claims are not identical,

Art Unit: 1616

they are not patentably distinct from each other because the applications provide the same compositions.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1616

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

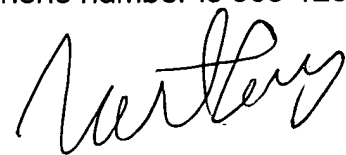

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
